

SolidView 2011.0 Release Notes

Overview

As a Major Enhancement release, SolidView 2011 requires a new activation key or license file. Customers with an existing MES agreement or who's licenses are still under their initial 90 day warranty should have received an email with their new activation codes. If you have not received your updated activation code, you should contact SolidView support before installing this release.

To update your SolidView product to 2011.0, select → Help | Web | Check for Updates from the SolidView Help menu.

SolidView 2011.0 includes the following enhancements:

SVD Password Protection

Create passwords for Open, Save, Export, Modify & Measure functions.

Variable Cut Depth

Adjust the cut depth on any vent or drain incision.

SolidWorks 2011

Support for all sldprt, sldasm and slddrw files.

One click Export

Now with the click of a button you can switch your default export icon between [Save Object] and [Save SVD].

CAD Import Colors

You can now see all coloring in the CAD file.

Measure Polyline

You can now obtain the number of edges, perimeter length, width and height of any polyline.
